<html>

<head>

  <title>Movie Search</title>

</head>

<body>

  <h1>Movie Search</h1>

  <form id="searchForm">

    <input type="text" id="searchQuery" placeholder="Enter movie title" />

    <button type="submit">Search</button>

  </form>

  <div id="searchResults"></div>

  <script>

    document.getElementById("searchForm").addEventListener("submit", function(event) {

      event.preventDefault();
```

```javascript
// Get the search query from the input field

var query = document.getElementById("searchQuery").value;

// Send an AJAX request to the server

var xhr = new XMLHttpRequest();

xhr.open("GET", "http://localhost:8888/search?query=" + query, true);

xhr.onreadystatechange = function() {

  if (xhr.readyState === XMLHttpRequest.DONE && xhr.status === 200) {

    // Process the response and display the search results

    var results = JSON.parse(xhr.responseText);

    displaySearchResults(results);

  }

};

xhr.send();

});
```

```javascript
function displaySearchResults(results) {

  var searchResultsDiv = document.getElementById("searchResults");

  searchResultsDiv.innerHTML = ""; // Clear previous results

  if (results.length === 0) {

    searchResultsDiv.textContent = "No movies found for the given search.";

  } else {

    var ul = document.createElement("ul");

    results.forEach(function(movie) {

      var li = document.createElement("li");

      li.textContent = movie.title;

      ul.appendChild(li);

    });

    searchResultsDiv.appendChild(ul);

  }

}

</script>
